

To all YRA members,

The correspondence below and attached is vital information for you all. As you will see from the TIME LINES BELOW your YRA Committee has been chasing the Bio-aerosol Report for many months, as it will be part of the answer we all needed from DEHP.

As this information has now JUST BEEN RECEIVED (refer the link shown on the email from Ms Morgan dated 30th October 2017), your committee wants you to have time to evaluate the answers before any formal reply is made to the authorities. While we know that there are many pages of reading and reports, your YRA Committee asks you to please commit yourself to doing this and to give any comments that you have in regard to the findings. As the State Election is imminent – please make any comments by no later than Friday 10th November 2017 so we have time to send a message to the proposed Candidates for the area – now COOMERA.

YRA needs an answer to the following:

This is the question (below) that we put to Minister Miles in our last letter 17 July 2017 page 15 of 16 pages, and it is the one question we should keep on asking.

*Will you and your fellow MPs ensure that a Springwood style monitoring station with all the necessary sensors (not just PM10 and PM2.5) is provided to our community and is positioned in an area in Yatala most likely to be impacted by the cumulative emissions from industry and quarries, without any further delays. We would like Yatala to be included in the list of monitoring stations available on this link <https://www.ehp.qld.gov.au/air/data/search.php>*

We welcome your comments ASAP please, as we will now put those questions to the Candidates whom wish to represent us in the next QL:D State Parliament. Time is NOT IN OUR FAVOUR so an answer ASAP is required immediately please.

Best regards,

YRA committee data base co-ordinator
